A secure email will be sent to your Grantham Gmail account. When you click the hyperlink within your registration email, you will be delivered to a web page which requests your GID number and two other authentication values.
Once you enter that information and submit, you will be brought to the profile page, where you will be required to set a password and should verify all your other information.

Once you continue from the profile page, you will be prompted to choose a preference. Grantham offers your disbursement in the form of a mailed check, Visa debit card or via direct deposit through your authorized checking account.
If you elect Direct Deposit, an area will appear below preferences to collect banking information.

Once you submit, you will be taken to a confirmation page to validate your information.

And would then receive the confirmation that your profile have been changed.
If you choose to opt in for text messages, you would check off Text messages on the refund profile page.

You will receive a 4 digit confirmation code that you will enter the next screen. Remember, standard text messaging rates apply.
After your code has been sent, you will be redirected to a short code page, and will receive the code via text to your phone to enter here.

Once you enter the information, you will be brought back to the profile page and receive a message that your profile has been updated.

You can update your email from the one defaulted in the settings to a personal email of your choice. Again, remember to choose a secure account as you will be receiving financial updates and sensitive information.

If you go to change it, you will be asked to enter in a second time and then save.

Congratulations. You have completed all steps necessary for notification preferences!
